This session will provide an overview of HB2764, a significant piece of legislation affecting assisted living centers that provide memory care services. Attendees will gain insights into the bill's key provisions, including enhanced regulations for memory care services training standards for staff and contractors, the creation of the vulnerable adult study committee, increase in civil penalties for non-compliance with health care statutes, and ensuring staff are not on the Adult Protective services registry. The session will also explore the implications for facility administrators, healthcare providers, and residents, offering practical guidance on navigating the changes and ensuring compliance. By the end of the session, participants will be equipped with the knowledge to adapt to the new regulatory landscape and improve the quality of care in their facilities.
